Re: 039-11533-00157
Administrative Amendment to
Part 70 039-7571-00157

Dear Mr. Click:

Newmar Corporation was issued a Part 70 permit on October 18, 1999, for a stationary motor home and travel trailer manufacturing facility. A letter requesting a change in the pressure drop range was received on October 27, 1999. An administrative amendment is granted pursuant to the provisions of 2-7-11, since the change in the monitoring is not environmentally significant. The permit is hereby administratively amended as follows:

The pressure drop required in the issued Part 70 permit under condition D.7.6 Parametric Monitoring, which is stated as 3.0 to 6.0 inches of water, is incorrect. According to the manufacturer's specification, the pressure drop range should be 0.5 to 3.0 inches of water. Therefore, condition D.7.6 is revised as follows (changes are bolded and deletion are struck-through for emphasis):

D.7.6 Parametric Monitoring

The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the woodworking shop at least once weekly when the woodworking shop is in operation when venting to the atmosphere. Unless operated under conditions for which the Compliance Response Plan specifies otherwise, the pressure drop across the baghouse shall be maintained within the range of ~~3-6~~ **0.5** and ~~6-0~~ **3.0** inches of water or a range established during the latest stack test. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the pressure reading is outside of the above mentioned range for any one reading.

The instrument used for determining the pressure shall comply with Section C - Pressure Gauge Specifications, of this permit, shall be subject to approval by IDEM, OAM, and shall be calibrated at least once every six (6) months.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5.
If you have any questions on this matter, please contact Aida De Guzman, at (800) 451-6027, press 0
and ask for Aida De Guzman or extension (3-4972), or dial (317) 233-4972.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Management

PART 70 OPERATING PERMIT

OFFICE OF AIR MANAGEMENT

**Newmar Corporation
355 North Delaware Street
Nappanee, Indiana 46550-0030**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 and 326 IAC 2-1-3.2 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: T039-7571-00157	
Issued by: Janet G. McCabe, Assistant Commissioner Office of Air Management	Issuance Date: October 18, 1999
1 st Administrative Amendment AA039-11533-00157	Affected Pages: 52
Issued by: Paul Dubenetzky, Chief Permit Branch Office Of Air management	Issuance Date:

Compliance Determination Requirements

D.7.3 Testing Requirements [326 IAC 2-7-6(1),(6)]

The Permittee is not required to test this facility by this permit. However, IDEM may require compliance testing at any specific time when necessary to determine if the facility is in compliance. If testing is required by IDEM, compliance with the particulate matter limits specified in Condition D.7.1 shall be determined by a performance test conducted in accordance with Section C - Performance Testing.

D.7.4 Particulate Matter (PM)

The baghouse used for PM control shall be in operation at all times when the woodworking machines located at North Delaware Street are in operation.

The portable dust collector for PM control shall be in operation at all times when the table saw located at the Service Repair Center is in operation.

The baghouse used in the woodworking shop at the Research and Development Center, shall be in operation at all times when the woodworking machines are in operation.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.7.5 Visible Emissions Notations

- (a) Daily visible emission notations of the woodworking facility located at North Delaware Street and the woodworking shop located at Research and Development Center stacks exhaust shall be performed during normal daylight operations when exhausting to the outside atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.

D.7.6 Parametric Monitoring

The Permittee shall record the total static pressure drop across the baghouse used in conjunction with the woodworking shop, at least once weekly when the woodworking shop is in operation when venting to the atmosphere. Unless operated under conditions for which the Compliance Response Plan specifies otherwise, the pressure drop across the baghouse shall be maintained within the range of 0.5 and 3.0 inches of water or a range established during the latest stack test. The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the pressure reading is outside of the above mentioned range for any one reading.

The instrument used for determining the pressure shall comply with Section C - Pressure Gauge Specifications, of this permit, shall be subject to approval by IDEM, OAM, and shall be calibrated at least once every six (6) months.
